DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-42 and 57-98, drawn to determining if two data units are duplicates by comparing two encoded values, classified in class 711, subclass 161.
 - II. Claims 43-56 and 99-112, drawn to determining if two data units are duplicates by comparing a decode value and the initial value, classified in class 711, subclass 161.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it decodes encoded values in order to determine duplicates. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
